

Collection System BEST PRACTICES

COMPLIANCE REDEFINED

Fischer Compliance is uniquely suited with decades of inside knowledge and experience helping clients reduce violations, enforcement, negative attention and confidently gain compliance assurance.

UNPARALLELED EXPERIENCE

Formerly employed for decades as an official government environmental and regulatory engineer, the company Principal, Mr. James Fischer, P.E., brings unique qualifications for public agencies seeking high quality compliance assurance interpreting regulations, permits and Orders including “Sanitary Sewer System Waste Discharge Requirements” (SSS WDRs).

- 12+ years experience as California Water Board’s lead collection system compliance/enforcement inspector.
- 30+ years regulatory/environmental compliance engineering experience.
- Credentialed USEPA Clean Water Act Compliance Inspector (NPDES).

“The “simulated” regulatory inspection improved our compliance and SSMP effectiveness.”

- MARK CHAUVEL,
Ojai Valley Sanitary District

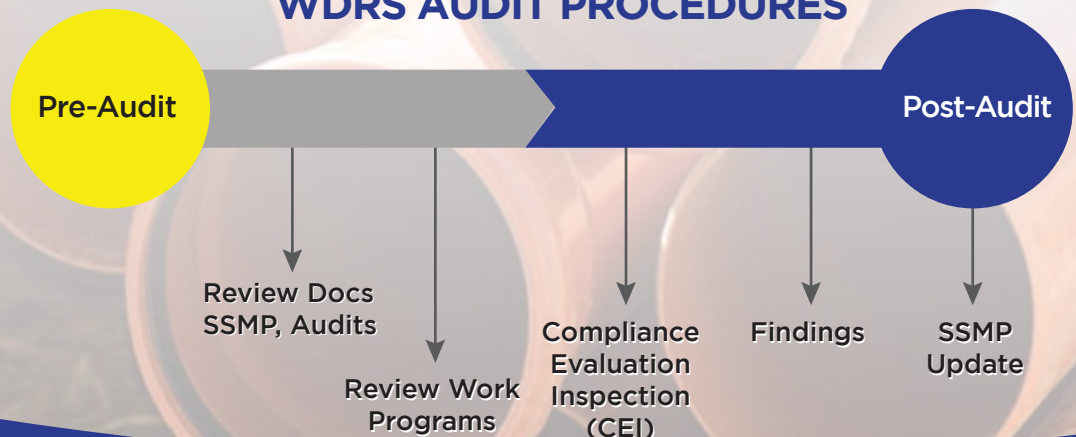

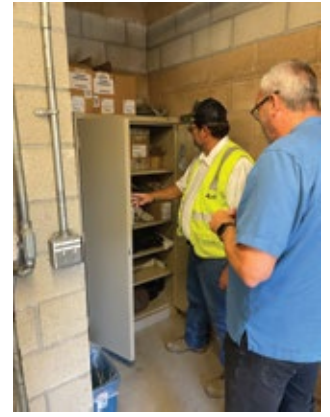

OUR APPROACH

Evaluating Sewer System Management Plan (SSMP) effectiveness and compliance is the cornerstone to compliance success. Fischer Compliance utilizes a comprehensive evaluation process including a “simulated” inspection model mirroring items checked by regulatory inspectors. Core auditing Waste Discharge Requirements (WDRs) procedures include:

- Pre-Inspection desktop review.
- Pre-Inspection Conference.
- Onsite “simulated” field Compliance Evaluation Inspection (CEIs) mirroring procedures used by U.S EPA and California Water Boards.
- Post- Inspection review.
- Findings/recommendations.
- Update SSMP/Improve resilience.

WDRS AUDIT PROCEDURES
